

- Compact, portable i-TTL Speedlight optimized for use with Nikon's Creative Lighting System (CLS)
- Operates as a stand-alone Speedlight or as a wireless remote unit.
- Nikon's i-TTL flash control provides accurate, seamless fill-flash capability under difficult, challenging lighting situations.
- Flash Value Lock (FV Lock) allows photographers to change the composition or zoom of the shot while maintaining the desired lighting of the subject.
- Wide-area AF illuminator for accurate autofocus in low light situations.
- Auto FP High Speed Sync Mode available with Nikon CLS compatible cameras with high speed sync capability.
- Flash color information for more accurate flash control.
- Bounce capabilities allow for reducing background shadows and more creative lighting effects.
